INTRODUCTION

For any Vermont business, the proper disposal of hazardous waste can be a significant expense. Improper management of this waste can lead to significant negative impacts on the environment and human health, as well as penalties and additional expenses. Fortunately for businesses generating small amounts of hazardous waste - Conditionally Exempt Generators (CEGs) - there are affordable environmentally-sound disposal options, including municipal hazardous waste collection programs. Municipal hazardous waste collection programs that accept CEG waste provide CEGs with an economical alternative to the traditional disposal method of utilizing a hazardous waste hauler. CEGs that participate in municipal programs package and self-transport their own waste to the program site. Although each program may differ from town to town, CEGs generally pay the hauler only for the cost of disposal or recycling of the hazardous waste.

The purpose of this Guide is to provide CEG's with the necessary information for using a municipal hazardous waste collection program and other alternative disposal options. The Guide is divided into four sections:

1. **Brief summary of Vermont hazardous waste regulations.**
2. **Listing of Vermont municipal hazardous waste collection programs that accept CEG waste**, including: complete contact information, program schedules, and any costs to CEGs.
3. **Directory of hazardous waste vendors servicing Vermont businesses.** This section is intended for businesses that generate specific wastes that are not accepted by their local municipal hazardous waste program, or for those businesses located in a town without a hazardous waste program that accepts CEG waste.
4. **Web-based hazardous waste resources** – a listing of available fact sheets, handbooks and guides.

- IMPORTANT -

For additional information on hazardous waste or to confirm the information in this Guide is current, contact either the Vermont Hazardous Waste Management Program at 802-241-3888 or the Vermont Environmental Assistance Division's non-regulatory Small Business Compliance Program at 800-974-9559.

I. BRIEF SUMMARY OF VERMONT HAZARDOUS WASTE REGULATIONS

The Vermont Hazardous Waste Management Regulations (VHWMR)

<http://www.anr.state.vt.us/dec/wastediv/rcra/hazregs/2001regs.htm>

provide a regulatory framework for managing hazardous waste in Vermont. They identify the wastes that are regulated as hazardous, and establish management standards for the businesses that produce or “generate”, transport, treat, store or dispose of them. In addition, the VHWMR include standards for hazardous waste recycling, used oil management, universal waste management, reporting and use of the hazardous waste manifest shipping document.

In Vermont, the vast majority of businesses subject to the VHWMR are regulated because they are hazardous waste generators. Under the VHWMR, businesses are responsible for determining if the waste that they generate is hazardous waste. Those that do generate hazardous waste must comply with certain waste management, reporting, record-keeping and shipping requirements. Any Vermont business that generates (or that transports, recycles, treats, stores or disposes of) hazardous waste must file a Vermont Hazardous Waste Handler Site ID Form

<http://www.anr.state.vt.us/dec/wastediv/rcra/handlers.htm> with the Agency of Natural Resources describing the types and monthly generation rate of each hazardous waste that it produces.

Hazardous waste generators are regulated at three different levels depending on the types and quantity of hazardous waste produced per month (i.e., conditionally exempt generator, small quantity generator, or large quantity generator). It is important to note that the level of regulation that a business is subject to - its “generator status” - is not related to the size of the business. For example, a very small business with five to ten employees that happens to generate more than 2,200 pounds of hazardous waste per month (roughly the equivalent of five 55-gallon drums) would be subject to the most stringent large quantity generator requirements, while a company with 150 employees that generates 20 pounds of hazardous waste per month would only need to comply with the relatively limited requirements for conditionally exempt generators.

Subchapter 2 of the VHWMR identifies the wastes that are regulated as hazardous, and subchapter 3 includes the requirements that each category of generator must meet. In general, conditionally exempt generators are only subject to basic container management, storage and spill response requirements, and have a number of waste management/disposal options available to them, including municipal collection events. Small and large quantity generators are subject to more stringent waste management standards, as well as additional requirements for record keeping, employee training, and contingency planning. Small and large quantity generators are also required to ship hazardous waste to certified treatment, storage, recycling, or disposal facilities using a hazardous waste manifest-shipping document.

Over-the-phone and on-site assistance is available from the Agency to help businesses comply with the technical aspects of the hazardous waste regulations, and reduce the

quantity and toxicity of wastes generated. The Agency also maintains an Internet web site with many assistance documents ranging from fact sheets dealing with specific hazardous waste management issues, to a handbook that provides a detailed overview of the conditionally exempt generator requirements http://www.anr.state.vt.us/dec/wastediv/rcra/ceg_hndb.pdf. In addition to the *VHWMR* <http://www.anr.state.vt.us/dec/wastediv/rcra/hazregs/2001regs.htm> and *Vermont Hazardous Waste Handler Site ID* form <http://www.anr.state.vt.us/dec/wastediv/rcra/handlers.htm> being available on-line, they are both available by request. There is no charge for a printed copy of the *VHWMR*, and there is no fee associated with submitting a Site ID form to the Agency.

- IMPORTANT -

For additional information on hazardous waste or to confirm the information in this Guide is current, contact either the Vermont Hazardous Waste Management Program at 802-241-3888 or the Vermont Environmental Assistance Division's non-regulatory Small Business Compliance Program at 800-974-9559.

II. VERMONT MUNICIPAL HAZARDOUS WASTE COLLECTION PROGRAMS THAT ACCEPT CONDITIONALLY EXEMPT GENERATORS

The following list provides the participant towns, contact information, frequency of collection events, and costs of municipal programs that accept self-transported CEG hazardous waste in their collection events. The programs are listed from North to South. If your town is not included in this list, contact your solid waste district or town hall to inquire about available hazardous waste disposal options.

III. HAZARDOUS & UNIVERSAL WASTE VENDORS DIRECTORY

The list of hazardous waste vendors is ever-changing. This Hazardous and Universal Waste Resource Directory provides a listing of vendors that accept various hazardous and universal wastes generated at Vermont businesses as of November 2003. (For a complete list of licensed hazardous waste transporters visit <http://www.anr.state.vt.us/dec/wastediv/rcra/pubs/Haztrans.pdf>) To use the directory, look for the waste you need to properly dispose at the top row and find a ● to find the corresponding vendor who will accept your particular waste. Complete contact information on all vendors is listed alphabetically below. Another disposal option for disposing of hazardous waste is the Municipal Collections for Conditionally Exempt Generators (CEGs) in Section II of this Guide.

Disclaimer: The Northeast Recycling Council, Inc. (NERC) does not believe this to be a complete list of available services, and by providing this list does not imply that the companies are in compliance with applicable laws. NERC does not endorse any specific program or business. NERC cautions all generators to make sure that the hazardous waste vendors they plan on using are in compliance with local, state, and federal requirements.

Waste Type Descriptions:

- Electronic Devices for Reuse must be in working order.
- Lead Acid Batteries includes: automobile batteries and small sealed lead batteries.
- Hazardous Waste includes: a large variety of materials regulated as hazardous waste, including petroleum.
- Mercury includes: switches, thermometers, thermostats, other mercury containing devices and liquid mercury.

- Metal includes: white goods such as dryers, washers, stoves, scrap steel, iron and other ferrous metals.
- Polychlorinated Biphenyls (PCBs) includes: Electrical equipment containing PCBs, PCB ballast recycling, PCB debris, PCB and non-PCB transformers.
- Propane Tanks and Cylinders includes: 20-pound and smaller tanks.
- Rechargeable Batteries includes: Nickel Cadmium (Ni-Cd), Nickel Metal Hydride (Ni-MH), Lithium Ion (Li-ion), and Small Sealed Lead (Pb) weighing less than 2 pounds/1 kilogram

Specific Company Information:

1. Also accepts all compressed common gas cylinders and fire extinguishers
2. Exchange service, whereby company will recycle the antifreeze and sell it back to generator
3. Accepts rechargeable mercury batteries only.
4. Computers only
5. Working computers and components only
6. Working or repairable computers and working televisions only
7. Non-PCB Ballasts only
8. Some pick-up minimums
9. Company recycles reclaimed product
10. Collects spent batteries only from the customers to which they sell
11. Also accepts all compressed common gases
12. Computer CPUs only
13. Working or repairable computers and components only
14. Newer working computers and components only
15. Also accepts helium tanks, refrigerant containers, and fire extinguishers

For a complete list of *licensed hazardous waste transporters* visit <http://www.anr.state.vt.us/dec/wastediv/rcra/pubs/Haztrans.pdf>

Other Resources:

Visit the RBRC website for a list of battery collection sites nearest you or to request a collection box for your place of business at www.rbrc.org.

Additional CRT and electronic processors and reuse facilities are listed on the International Association of Electronics Recyclers website at www.iaer.org.

The Electronics Industry Alliance Consumer Education Initiative maintains a list of CRT and electronic recycling and reuse opportunities at www.eiae.org.

Visit “Thermostat Recycling Corporation” for a list of collection sites for wall-mounted thermostats. Visit http://nema.org/index_nema.cfm/664/ and click on “Find a Participating Wholesaler” for a list of thermostat collection sites nearest you.

Visit the Vermont Material Exchange website at <http://www.vbmex.net/> to post and view discarded used commercial materials.
